

To MidState Pulmonary patients,

During the ongoing COVID-19 pandemic, we want to assure you that we are prioritizing the health and safety of our patients, staff and community. As always, we are working to provide the high-quality care our patients need while helping prevent the spread of disease.

As concerns about the spread of COVID-19 continue, we are monitoring the situation and complying with all local, state and federal recommendations. We are also asking that patients who develop a fever or respiratory symptoms such as cough or shortness of breath please call our office before coming to your in-person appointment.

We remain committed to patient care during this time and will continue to adapt our services to meet your needs. As part of this commitment, **we are proud to announce we are now offering telehealth services.** Telehealth appointments are available for routine office visits and limited procedure and testing follow-ups. Please call our office for more information and access our telemedicine consent form [by clicking here](#).

For our patients, we recommend following the Centers for Disease Control's (CDC) guidelines and hygiene practices. To find out more about COVID-19 and review recommended guidelines, please visit the CDC website. For more information on our telehealth services, please call 615.284.5098.

During this time, we send best wishes of health and safety to you and your loved ones. We thank you for being our patient and look forward to continuing to care for you.

Sincerely,  
Your MidState Pulmonary Team
